

A Project Report on

.NET (TASK BASED)

Submitted as partial fulfillment of the requirement

For M.Sc. IT - Semester IV

Prepared for Subject: IT Project (ITCC14)

Prepared By

Name of Student : Kanzariya Foram A

Enrollment No.:21MSCIT22004

Exam No.: 444005

Shri Maneklal M.Patel Institute of Sciences and Research Kadi Sarva Vishwavidyalaya Department of M.Sc.IT, Gandhinagar

ACKNOWLEDGMENT

I am grateful to my internal guide **Yagnesh vyas** for providing me valuable guidance for the **IT PROJECT** (ITCC14) and other domain related information.

I would like to express my endless thanks to **AMIT Patil(BINARY REPUBLIKPVT.LTD)**, for giving invaluable advice, direction, support and transferring knowledge throughout the project work.

Also my hearty gratitude to Head of Department, **Prof. (Dr.) B. R. Pandya** for giving me an opportunity for learning through the process of project work by which I can improve my technical skills along with practical exposure and its applicability in the industry.

Name of Student:Kanzariya Foram A.

Signature of Student:

Enrollment No.: 21MSCIT22004

Shri Maneklal M. Patel Institute of Sciences and Research

Kadi Sarva Vishwavidyalaya

Department of M.Sc.IT, Gandhinagar

INTERNAL PROJECT CERTIFICATE

This is to certify that **Kanzariya Foram A.** having Enrollment No. **21MSCIT22004** was working for the M.Sc. IT department as project trainee from <15-dec-2022> to <21-MAR-2023>. During the above period, we found her to be very sincere and hardworking. She has completed IT Project (ITCC14) on <.NET task based> satisfactorily under the guidance of guide. We appreciate the enthusiasm & dedication towards work. We wish her very best in all his future endeavors.

Project Guide

Mr. Yagnesh vyas
Asst. Professor
M.Sc. (IT) Department.

Prof. (Dr.) B. R. Pandya

Head of Department, M.Sc. IT

Date: 21.03.2023

Internship Completion Certificate

This is to certify that **Ms. Foram Kanzariya** (21MSCIT22004) a student of M.Sc. - IT, KSV University, Gandhinagar has completed her onsite full-time internship at **Binary Republik**, South Bopal, Ahmedabad from 16th December 2022 to 21st March 2023.

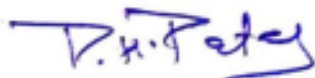

Please find the following detail regarding the project completed:

1	Project Title	Time Reporting System (TRS)
2	Technology/Tools/Software	FrontEnd : Angular BackEnd : DotNet Core DataBase : SQL Server
3	Mode of Internship	Onsite
4	Project Guide/Mentor	Mr. Jay Pankhania Sr. Software Developer jay.pankhania@binaryrepublik.com

During her internship with us we found her to be hard working, diligent and honest in performing her duties.

We wish her all the best for her future assignments.

With best wishes.

Piyush Patel
Project Manager

Binary Republik

**SHRI MANEKLAL M.PATEL INSTITUTE OF
SCIENCE & RESEARCH**

M.SC(INFORMATION TECHNOLOGY)

SEM-4

PROJECT REPORT: TASK BASE

COMPANY NAME : BINARY REPUBLIK PVT.LTD

LANGUAGE : .NET

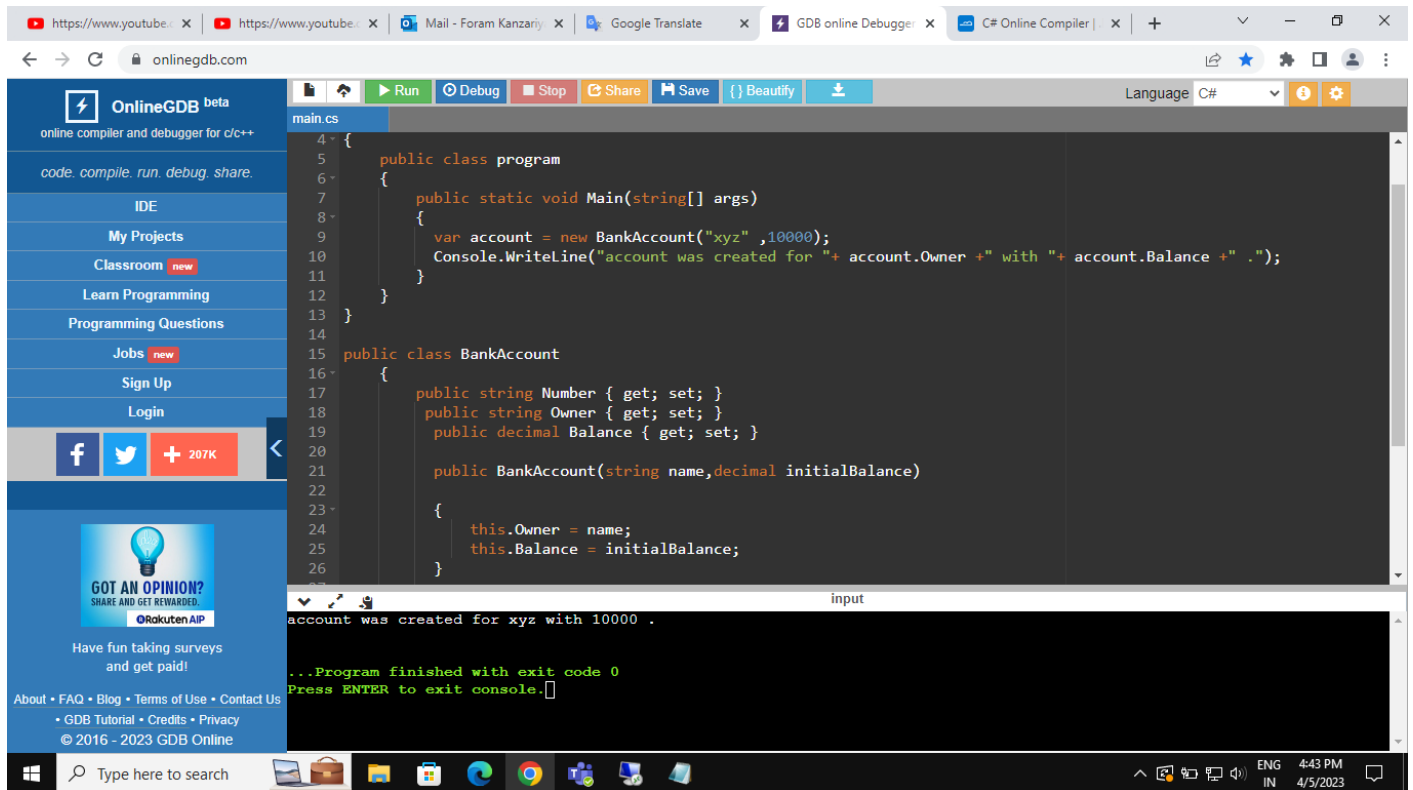

STUDENT NAME: Kanzariya Foram A.

ENROLLMENT NO: 21MSCIT22004

INDEX

1. which is C# class and object
2. which is C# fibonacci series
3. which is C# abstract class
4. which is C# inheritance
5. which is C# polymorphism
6. Write a method that overloads the GetName() method by taking in a name and printing "Hello" with that name
7. Write a method that overloads the PerformAction() method with two arguments it could be numbers or strings.
 - If both arguments are number then it should return Sum of both numbers.
 - If both arguments are strings then it should return concatenate of both string with space as separator.
 - If there is no any arguments then it should print "Enter correct values".
8. Registration form in Javascript with validation
9. Employee Details task with jQuery
10. Timesheet task with jQuery.
11. Todo task with jQuery.
12. Registration form in .net mvc
13. Make dummy web API in .net mvc.
14. Work with database and do all operations on that
15. CRUD operation in .net mvc with local file image
16. time sheet

Task:1 which is C# class and object.

The screenshot displays the OnlineGDB website interface. The browser's address bar shows the URL `onlinegdb.com`. The website's header includes the OnlineGDB logo and navigation links such as "code. compile. run. debug. share.", "IDE", "My Projects", "Classroom", "Learn Programming", "Programming Questions", "Jobs", "Sign Up", and "Login". A sidebar on the left contains social media links for Facebook, Twitter, and a "207K" badge. The main content area features a C# code editor with the following code:

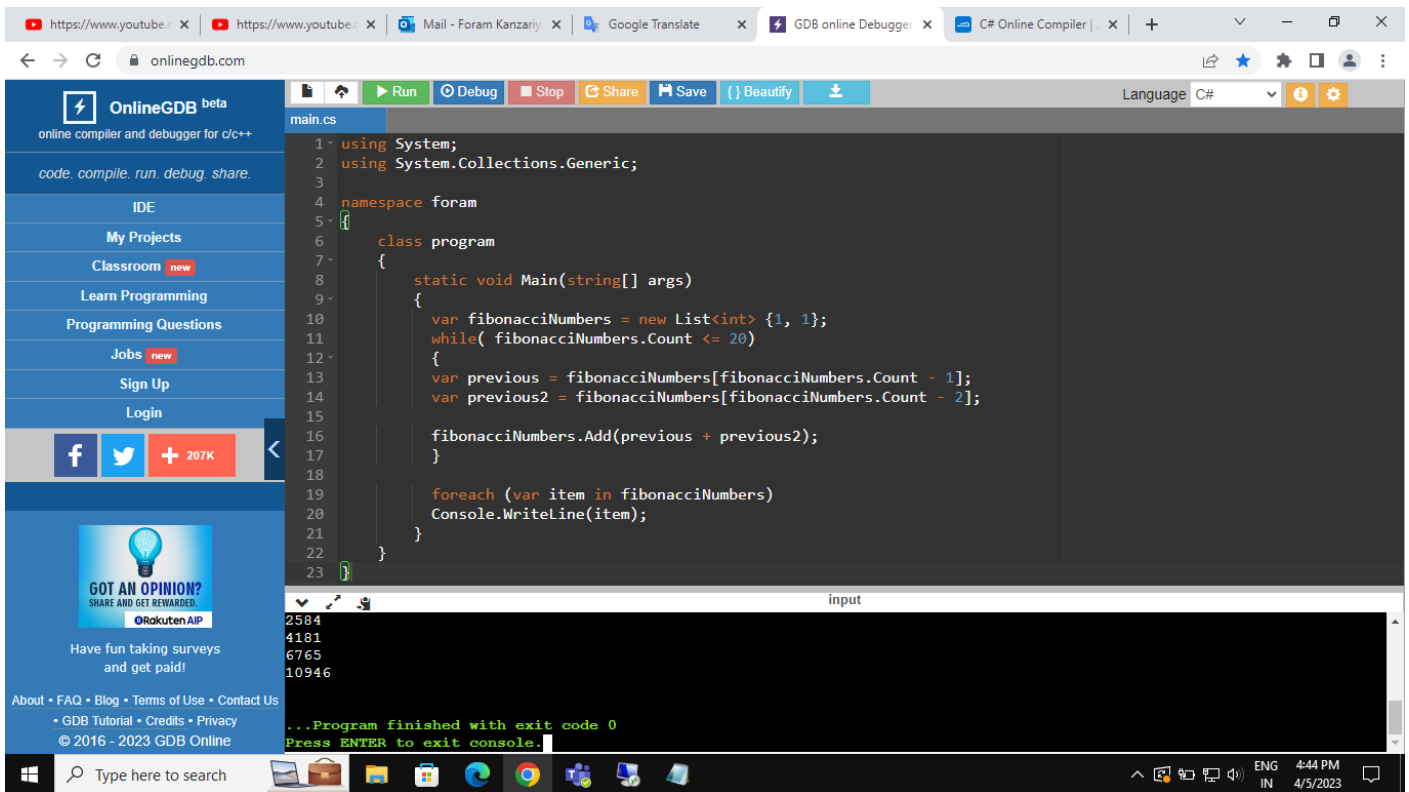

```
4 {  
5     public class program  
6     {  
7         public static void Main(string[] args)  
8         {  
9             var account = new BankAccount("xyz", 10000);  
10            Console.WriteLine("account was created for " + account.Owner + " with " + account.Balance + " .");  
11        }  
12    }  
13 }  
14  
15 public class BankAccount  
16 {  
17     public string Number { get; set; }  
18     public string Owner { get; set; }  
19     public decimal Balance { get; set; }  
20  
21     public BankAccount(string name, decimal initialBalance)  
22     {  
23         this.Owner = name;  
24         this.Balance = initialBalance;  
25     }  
26 }
```

The output console at the bottom shows the execution results:

```
input  
account was created for xyz with 10000 .  
...Program finished with exit code 0  
Press ENTER to exit console.
```

The Windows taskbar at the bottom indicates the system time as 4:43 PM on 4/5/2023.

Task:2 which is C# fibonacci series.

The screenshot shows the OnlineGDB website interface. The browser's address bar displays 'onlinegdb.com'. The left sidebar contains navigation links: 'IDE', 'My Projects', 'Classroom', 'Learn Programming', 'Programming Questions', 'Jobs', 'Sign Up', and 'Login'. Below these are social media icons for Facebook and Twitter, and a '207K' badge. A 'GOT AN OPINION?' survey banner is also visible. The main editor area shows a C# program for calculating the Fibonacci series. The code is as follows:

```
1 using System;
2 using System.Collections.Generic;
3
4 namespace foram
5 {
6     class program
7     {
8         static void Main(string[] args)
9         {
10             var fibonacciNumbers = new List<int> {1, 1};
11             while( fibonacciNumbers.Count <= 20)
12             {
13                 var previous = fibonacciNumbers[fibonacciNumbers.Count - 1];
14                 var previous2 = fibonacciNumbers[fibonacciNumbers.Count - 2];
15
16                 fibonacciNumbers.Add(previous + previous2);
17             }
18
19             foreach (var item in fibonacciNumbers)
20                 Console.WriteLine(item);
21         }
22     }
23 }
```

The output window shows the following numbers:

```
2584
4181
6765
10946
```

The console output indicates that the program finished with exit code 0 and prompts the user to press ENTER to exit the console.

Task:3 which is C# abstract class.

The screenshot displays the OnlineGDB web interface. The browser's address bar shows the URL 'onlinegdb.com'. The left sidebar contains navigation links such as 'IDE', 'My Projects', 'Classroom', 'Learn Programming', 'Programming Questions', 'Jobs', 'Sign Up', and 'Login'. The main editor area shows a C# file named 'main.cs' with the following code:

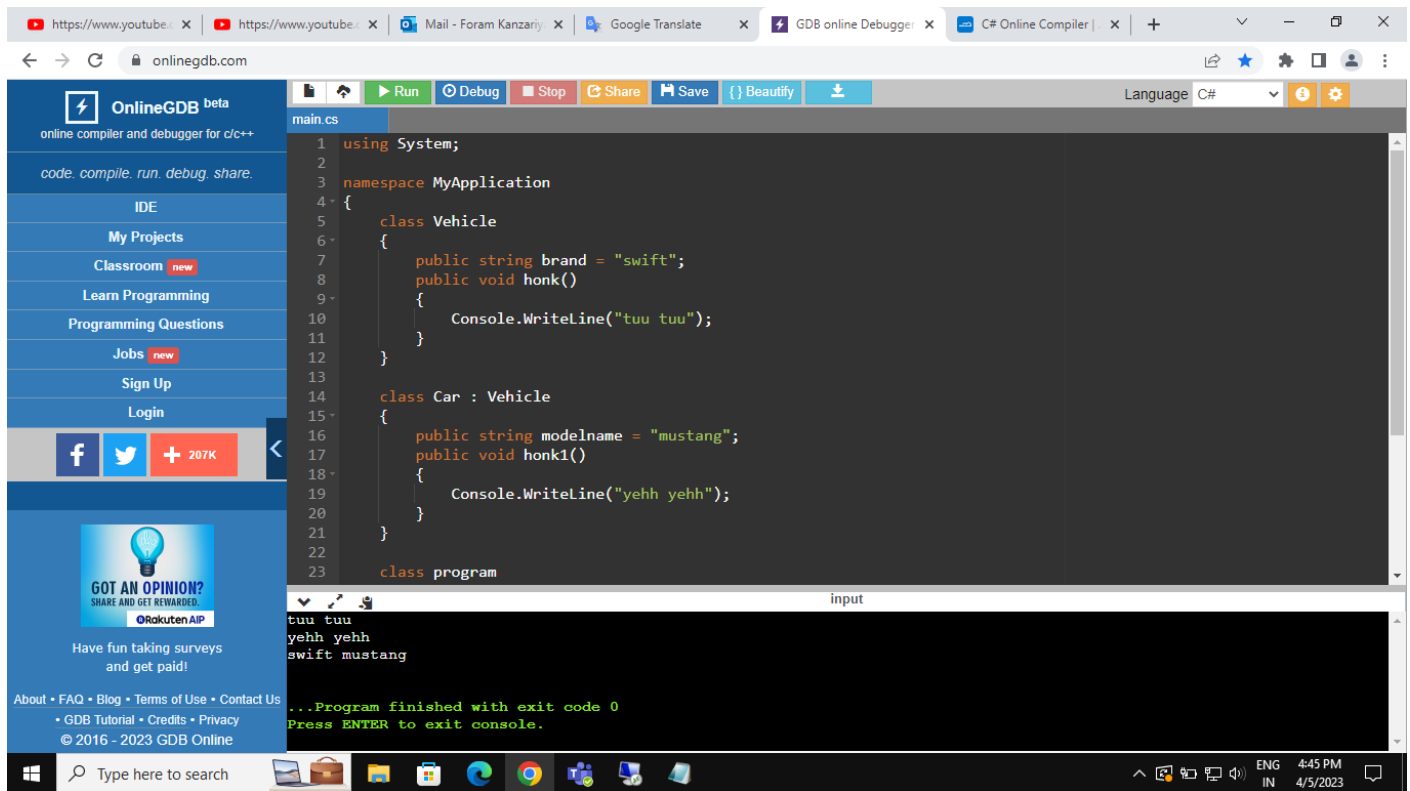

```
7 public void sleep()  
8 {  
9     Console.WriteLine("zzzz");  
10 }  
11 }  
12 class pig : animal  
13 {  
14     public override void animalsound()  
15     {  
16         Console.WriteLine("the pig says: heee heee");  
17     }  
18 }  
19 class program  
20 {  
21     static void Main (string [] args)  
22     {  
23         pig myPig = new pig();  
24         myPig.sleep();  
25         myPig.animalsound();  
26     }  
27 }  
28 }  
29 }
```

The output window at the bottom shows the execution results:

```
zzzz  
the pig says: heee heee  
...Program finished with exit code 0  
Press ENTER to exit console.
```

The Windows taskbar at the bottom indicates the system time is 4:44 PM on 4/5/2023.

Task:4 which is C# inheritance.

The screenshot displays the OnlineGDB website interface. The browser's address bar shows the URL <https://www.youtube.com>. The OnlineGDB website header includes the logo, the text "OnlineGDB beta", and the tagline "online compiler and debugger for c/c++". The main navigation menu lists "code. compile. run. debug. share.", "IDE", "My Projects", "Classroom", "Learn Programming", "Programming Questions", "Jobs", "Sign Up", and "Login". A sidebar on the left features social media links for Facebook, Twitter, and a "207K" button. The main content area shows a C# code file named "main.cs" with the following code:

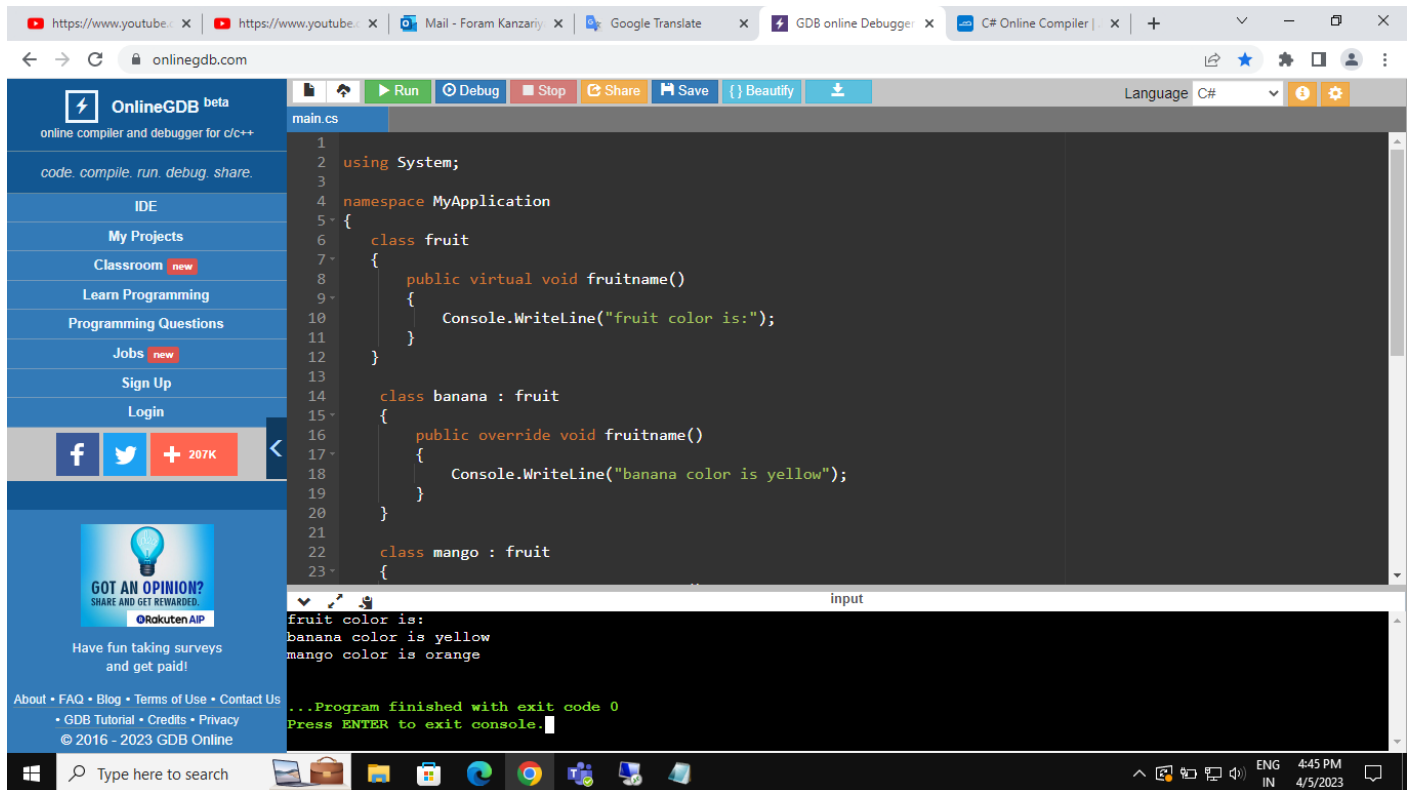

```
1 using System;
2
3 namespace MyApplication
4 {
5     class Vehicle
6     {
7         public string brand = "swift";
8         public void honk()
9         {
10             Console.WriteLine("tuu tuu");
11         }
12     }
13
14     class Car : Vehicle
15     {
16         public string modelname = "mustang";
17         public void honk1()
18         {
19             Console.WriteLine("yehh yehh");
20         }
21     }
22
23     class program
```

The program is executed, and the output is displayed in the console window:

```
tuu tuu
yehh yehh
swift mustang
...Program finished with exit code 0
Press ENTER to exit console.
```

The Windows taskbar at the bottom shows the system clock as 4:45 PM on 4/5/2023.

Task:5 which is C# polymorphism.

The screenshot shows the OnlineGDB website interface. The browser's address bar displays 'onlinegdb.com'. The left sidebar contains navigation links such as 'IDE', 'My Projects', 'Classroom', 'Learn Programming', 'Programming Questions', 'Jobs', 'Sign Up', and 'Login'. The main editor area shows a C# file named 'main.cs' with the following code:

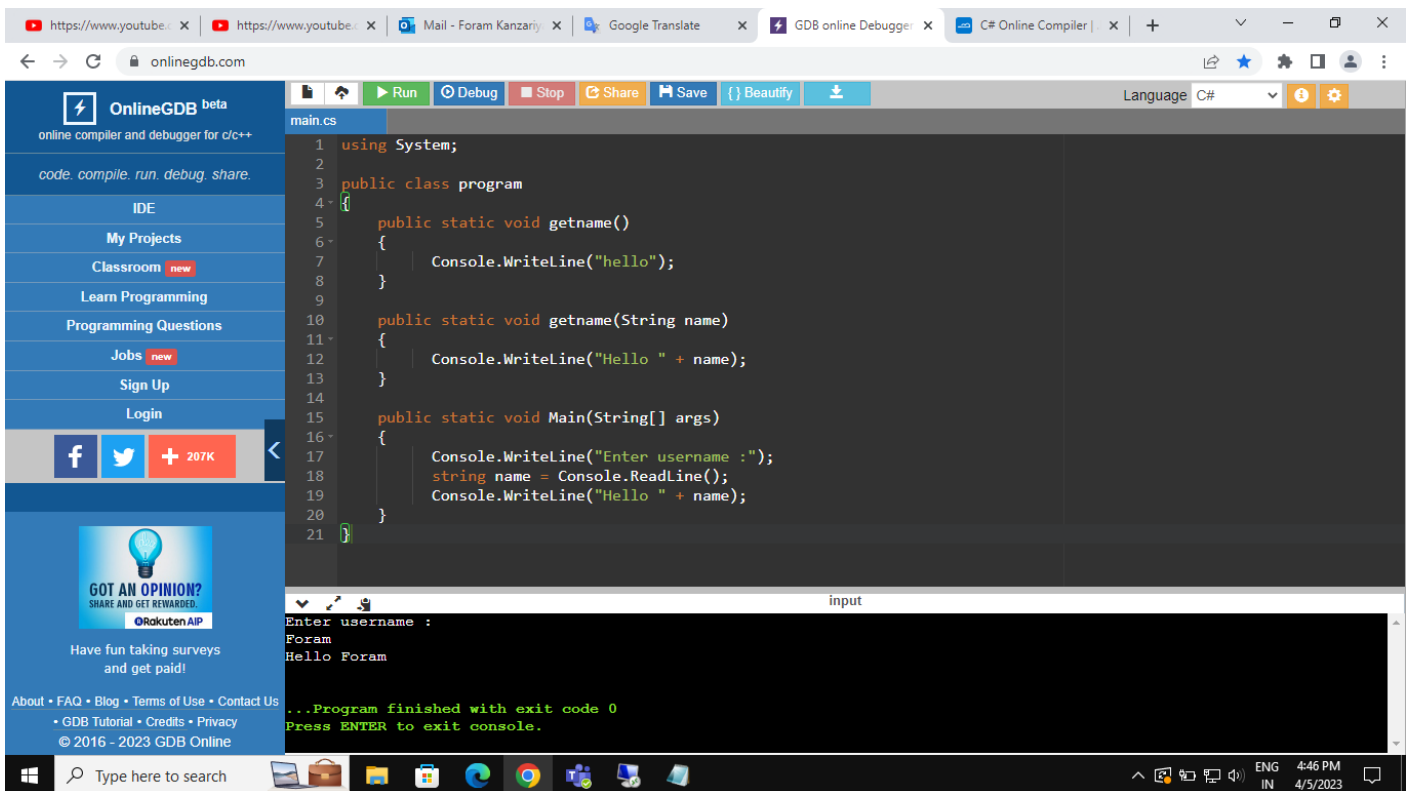

```
1 using System;
2
3
4 namespace MyApplication
5 {
6     class fruit
7     {
8         public virtual void fruitname()
9         {
10             Console.WriteLine("fruit color is:");
11         }
12     }
13
14     class banana : fruit
15     {
16         public override void fruitname()
17         {
18             Console.WriteLine("banana color is yellow");
19         }
20     }
21
22     class mango : fruit
23     {
```

The output console at the bottom shows the results of the program execution:

```
fruit color is:
banana color is yellow
mango color is orange
...Program finished with exit code 0
Press ENTER to exit console.
```

The Windows taskbar at the bottom indicates the system time as 4:45 PM on 4/5/2023.

Task:6 Write a method that overloads the GetName() method by taking in a name and printing “Hello” with that name.

The screenshot shows the OnlineGDB web IDE interface. The left sidebar contains navigation links like IDE, My Projects, Classroom, Learn Programming, Programming Questions, Jobs, Sign Up, and Login. The main editor area displays a C# program in a file named main.cs. The code defines a class 'program' with two static methods: 'getname()' and 'getname(String name)'. The 'Main' method prompts the user for a username, reads it, and calls the 'getname' method with the input name. The console output at the bottom shows the program execution: 'Enter username :', 'Foram', and 'Hello Foram'. The status bar at the bottom indicates the program finished with exit code 0.

```
1 using System;
2
3 public class program
4 {
5     public static void getname()
6     {
7         Console.WriteLine("hello");
8     }
9
10    public static void getname(String name)
11    {
12        Console.WriteLine("Hello " + name);
13    }
14
15    public static void Main(String[] args)
16    {
17        Console.WriteLine("Enter username :");
18        string name = Console.ReadLine();
19        Console.WriteLine("Hello " + name);
20    }
21 }
```

input

```
Enter username :
Foram
Hello Foram

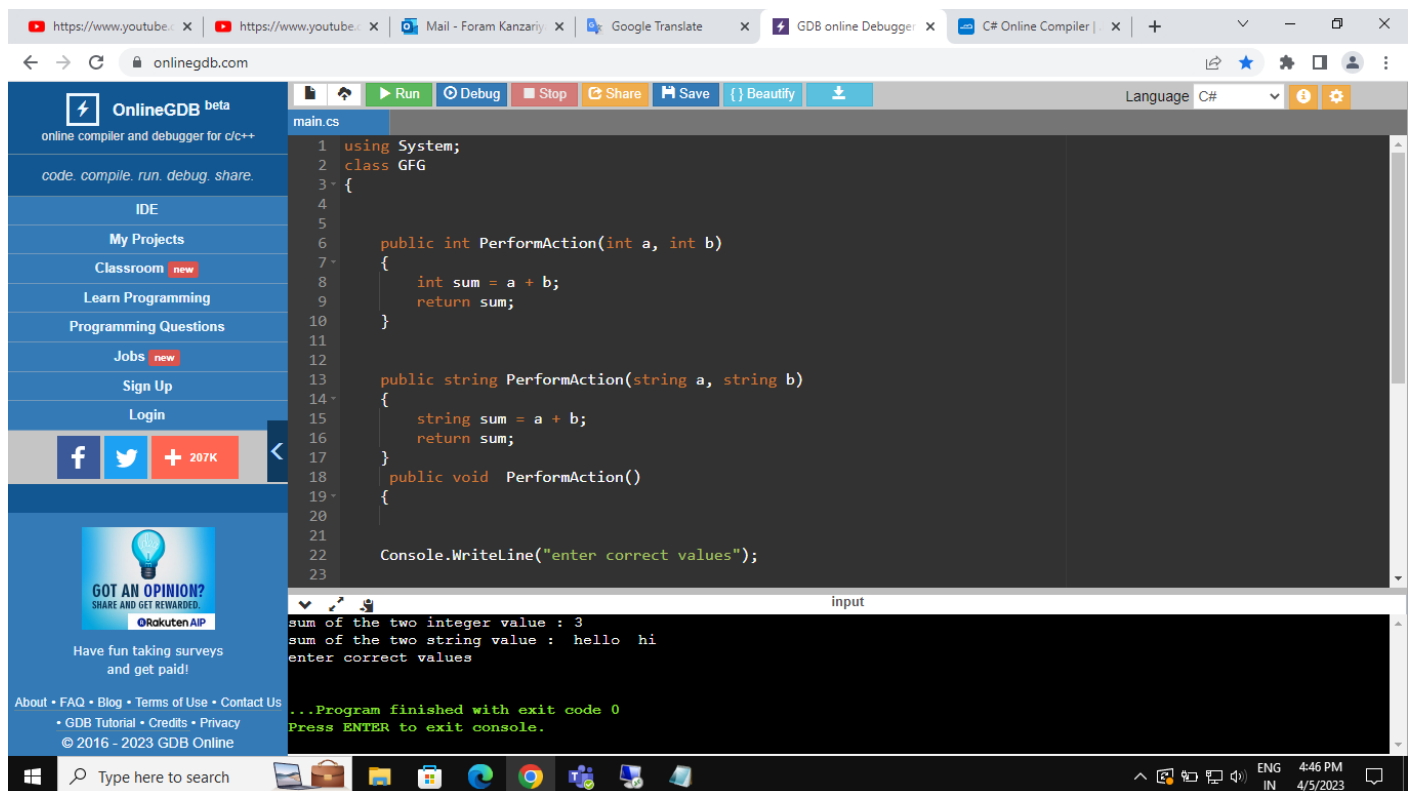

...Program finished with exit code 0
Press ENTER to exit console.
```

Task:7 Write a method that overloads the PerformAction() method with two arguments it could be numbers or strings.

If both arguments are number then it should return Sum of both numbers.

If both arguments are strings then it should return concatenate of both string with space as separator.

If there is no any arguments then it should print "Enter correct values".

The screenshot displays the OnlineGDB web interface. The main editor shows a C# program with the following code:

```
1 using System;
2 class GFG
3 {
4
5
6     public int PerformAction(int a, int b)
7     {
8         int sum = a + b;
9         return sum;
10    }
11
12
13    public string PerformAction(string a, string b)
14    {
15        string sum = a + b;
16        return sum;
17    }
18    public void PerformAction()
19    {
20
21
22        Console.WriteLine("enter correct values");
23    }
24 }
```

The console output shows the results of the program execution:

```
sum of the two integer value : 3
sum of the two string value : hello hi
enter correct values
...Program finished with exit code 0
Press ENTER to exit console.
```

Task:8 Registration form in Javascript with validation.

The screenshot shows a web browser window with the address bar displaying the file path: `C:/Users/foram.kanzariya/Desktop/registration/myregistration.html`. The browser tabs include YouTube, Mail - Foram Kanzariya, Google Translate, New Tab, and the active tab, Registration Form. The registration form itself is titled "Registration Form" and contains several input fields with associated validation messages in red text:

- First Name:** The message "Enter valid FirstName" is displayed above the input field.
- Last Name:** The message "Invalid lastName." is displayed above the input field.
- Address:** The message "Address can't be empty" is displayed above the input field.
- city:** The message "Select your city" is displayed above the input field.
- State:** The message "Select your state" is displayed above the input field.
- pincode:** The message "PinCode is Invalid." is displayed above the input field.
- Gender:** There are two radio buttons labeled "Male" and "Female".

The Windows taskbar at the bottom shows the search bar with the text "Type here to search", several application icons, and the system clock indicating the time as 4:53 PM on 4/5/2023.

Task:9 Employee Details task with jQuery.

Task:14 Work with database and do all operations on that

The screenshot displays the Microsoft SQL Server Management Studio (SSMS) interface. The title bar indicates the connection to '192.168.1.132:intern_Dev (SQLDBContributor (99))'. The Object Explorer on the left shows the database structure, including tables like 'dbo.Products' and 'dbo.Students'. The main query editor contains a SQL script with several queries. The 'Results' pane at the bottom shows the output of the first query, which is a table with columns 'ProductID', 'ProductName', 'Price', and 'Unit'. The results show one row for 'Bread' with a price of 30 and unit '12 - 39 pkgs.'.

```
